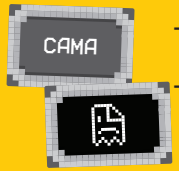
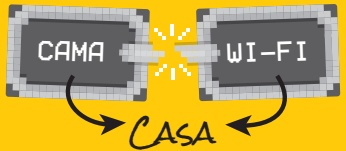
- **Conteúdo:**
- 176 Word cards
- 44 ERROR 404 cards
- 1 drawing card and marker
- 1 sand timer

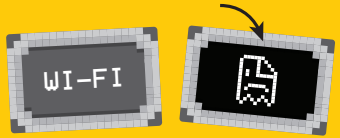


- **How to Play:**
- Shuffle the cards and place them on the table in 2 separate piles.
- The youngest player draws 2 cards from the top and places them side by side on the table, face up.
- Everyone plays simultaneously. The first player to say out loud a word that connects both cards wins the round and keeps one of the cards for final scoring.

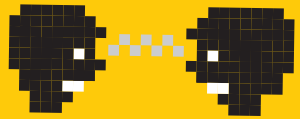


- Leave the other card on the table (the one that benefits you most).
- The same card can be used a maximum of 3 times (after that, replace both cards with 2 new ones).
- Then, the player to the left places a new card from the pile (there must always be 2 face-up cards on the table).
- Repeat the process.

- **Special Card: ERROR 404**



- When you reveal an ERROR 404 card, the connection is broken and you must complete a MIND CHALLENGE.



MIND CHALLENGE:

- Choose a partner from the other players. Together, you must simultaneously guess a word that connects the card to one of the following:

- **A) An object of your choice that you place on the ERROR 404 card.**

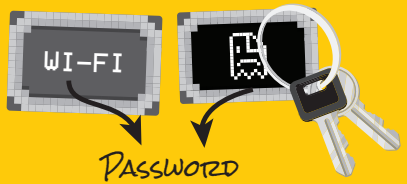
- **B) Draw an object on the provided card and place it on the ERROR 404 card.**

- **C) Act out or make sounds representing something.**

(continues)

- You must “get into each other’s minds” and say the same word, related to the card, object, or action, out loud at the same time.
- You have 30 seconds.

• **Exemplo com Carta e Objeto:**



- **If you say the same word:**
  - The player who revealed the ERROR 404 card keeps it.
  - The other player keeps the remaining card for final scoring.

- **If you do not say the same word:**
  - You fail the challenge.
  - The cards are returned to the bottom of the pile and the game continues.

- If 2 ERROR 404 cards appear, the two players choose one of the three options (A, B or C) for the Mind Challenge.
- Then, the player to the right continues by drawing 2 new cards.
- If a player already has 2 ERROR 404 cards (two completed challenges) and draws a third one: The other players choose which challenge (A, B or C) they must perform

• **A player wins the game when:**
  - Reaches 12 points, having conquered 3 mental challenges.
  - Or reaches 20 points with 1 mental challenge conquered.
- **1 Word card = 1 point**
- **1 ERROR 404 card = 2 points**
